

## PRODUCTION OFFER OF 105MM / M56

The M-56 Howitzer is a 105 mm artillery gun is a versatile, towed, lightweight artillery piece (approx. 2,190–2,370 kg) designed for high mobility and indirect fire support. It features a 33-caliber barrel, a double-baffle muzzle brake, and can achieve a maximum range of up to 18.5 km, with a firing rate of 6-8 rounds/min. Comparable to the American M101, 105mm Howitzer

<b>WEAPON TECHNICAL DATA</b>	
➤ Calibre	105 mm
➤ Overall length of barrel	3480 mm
➤ Maximum range with special charge	13 km
➤ Nitrogen pressure in recuperator	50 kg/cm <sup>2</sup>
➤ Oil amount in recoil brake	6,3 l
➤ Horizontal field of action:	
With spread trails	52°
With folded trails	16°
➤ Vertical field of action:	
With spread trails	-12° to +68°
With folded trails	-12° to +16°
➤ Overall length in travelling position	6170 mm
➤ Overall length in firing position	5460 mm
➤ Track width	1800 mm
➤ Height at maximum elevation	3800 mm
➤ Height in travelling position	1560 mm
➤ Weight in travelling position	2100 kg
➤ Weight of the weapon set, tools and accessories	40 kg
➤ Rate of motion, max	70 km/h
