

PAC103-762
PAC103S-762

PAC103-762

High quality AK carbines with a classic AK design. It work on the principle of a long piston stroke, so all of the residue resulting from the combustion of gunpowder stays on the piston, not on the bolt or bolt carrier group, which translates into reliable operation for which AK system is famous.

PA-KO AK carbines have a reinforced bolt carrier tail and a nitrided piston. Nitriding hardens the piston surface so that it is less exposed to damage caused by various chemical compounds generated during combustion of the propellant.

Aluminium handguard with Rail Interface System allows for installation of various accessories such as front grips, tactical light, laser devices and other force multipliers. Rear sight is equipped with rail for mounting red dot sights. Rail can be used as back up iron sights.

The barrel in the carbine is made in button rifling process. This method is very precise and makes barrel very strong. The barrels maintain excellent parameters even after many thousands of shots.

PAC103-762

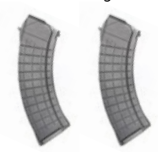

PAC103S-762

	PAC103-762	PAC103S-762
Caliber	7,62 x 39 mm	
Operation	semi-, full automatic, long piston stroke	
Rate of fire	app 600 rpm	
Sight radius	370 mm	
Max sight range	1000 m	
Battlesight zero	350 m	
Effective range	400 m	
Maximum range	~1400 m	
Barrel length	415 mm	
Muzzle velocity	~715 m/s	
Barrel life span	app 25,000 rds	
Magazine capacity	30rds	
Weight	3,8 kg*	3,7 kg*
Length	840-920 mm*	695/885 mm*
Muzzle device	A2 muzzle device, silencer compatible	
Stock	polymer, 6 position	steel, folding
Grip	polymer	
Handguard	aluminium, Rail Interface System, can fit grenade launcher	
Includes	2 x magazine, sling, magazine pouch, cleaning rod	

* Final weight and dimensions depends on chosen accessories (stock, muzzle device, etc.).

2 x 30 rd Magazine

Sling

Mag Pouch

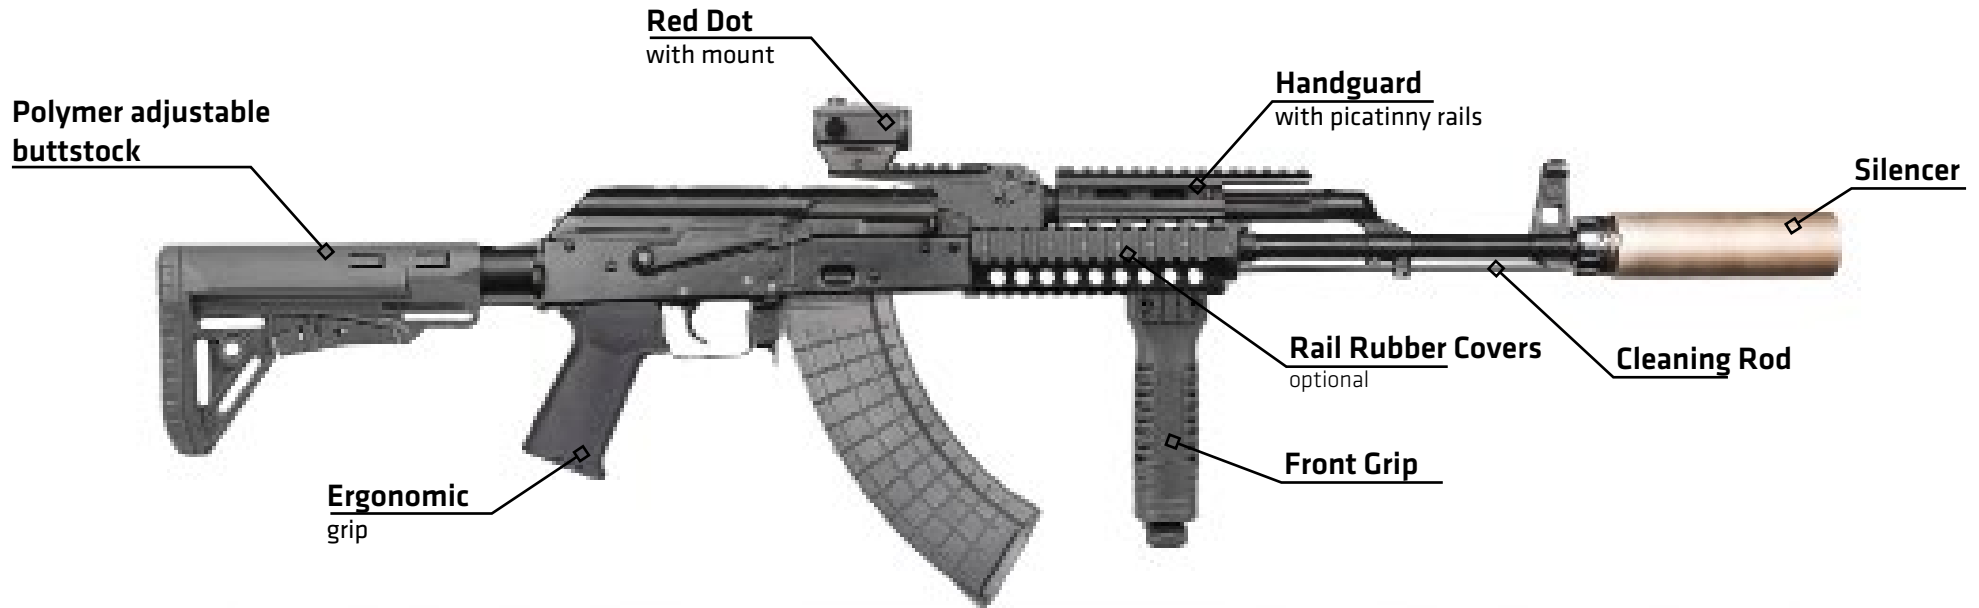

Cleaning/AK tool kit

7.62 x 39 mm

PAC103 can be equipped with various accessories to enhance operator capabilities on the modern battlefield.

RED DOT SIGHT / TACTICAL LIGHT / LASER DEVICE / FRONT GRIP / SILENCER

PAC103 can be fitted with any type of Mil-Spec AR stock.

Presented with LS321 Laser Device

Front rail can be equipped with various types of front grips to enhance weapon control.

NOTE: Accessories can be bought separately and are not part of PAC103 / PAC103S set.

POSSIBLE PAC103 / PAC103S VARIANTS

**PAC103 WITH ALUMINIUM HANDGUARD WITH PICATINNY RAILS
RED DOT MOUNTED ON RAIL IN PLACE OF REAR SIGHT**

PAC103 WITH GP34 GRENADE LAUNCHER

**PAC103 WITH STANDARD REAR SIGHT
WITH RED DOT MOUNTED ON FRONT RAIL**

VERSATILE TOOL FOR MODERN BATTLEFIELD

Light

In some circumstances, the transition to a completely new weapon system and training all staff and instructors in its use is extremely difficult. At the same time, the modern battlefield is changing and requires the use of new accessories and technologies that are often incompatible with traditional small arms systems. PAC103 is a solution that combines the traditional operation of the AK system with the ability to use modern accessories necessary for effective day and night operations.
