

Multicopter Defender

Feature:

- Drone is now commonly used to spy personal privacy or top-secret information day and night, it's also used as an invasive tool by using with weapon for illegal purpose, which is caused a serious problem on the sky, so Multicopter Defender is an ideal device to counter the threat nowadays.
- The shoulder rifle can interfere with radio frequency of the drone within 3 seconds to trick it into believing it's out of range of the owner, then the drone is programmed to either return to the owner, make a controlled descent, or fall out of the sky. The device allows to control ISM or GPS signal individually, for example, the user can only cut down ISM signal while keep GPS working to track the UAV owner's position and destroy it.
- With ability to use with night vision device or thermal scope for night time operation within 1100m.
- The high gain directional antenna can be free from environmental interference.

Specification:

1. Applicable GPS frequency: L1 / L2
2. Applicable ISM band(2.4G): 2400~2500 MHz
3. Applicable ISM band(5.8G): 5700~5900 MHz
4. Output power: Up to 30W and above.
5. Antenna gain: 10~12dBi, ERIP: up to 180dBm
6. Effective range: Above 1100M

Video: Take down the drone

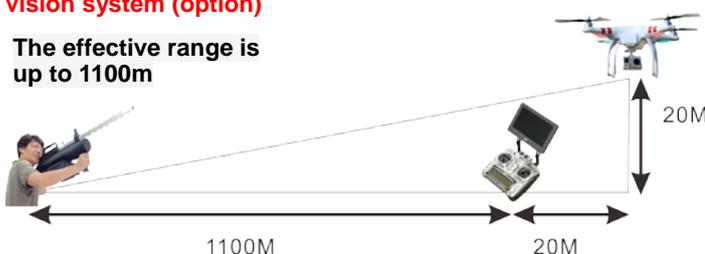

24h Long Distance night vision system (option)

24h Thermal scope (option)

The effective range is up to 1100m

Operation Instruction

Power on GPS

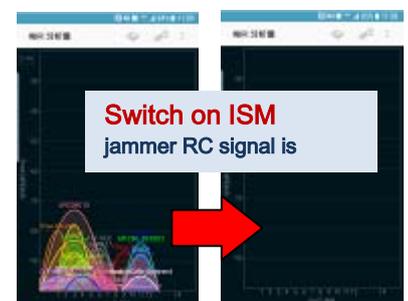

GPS signal is missing, while flight condition can be tracked as well, which force the drone should be either controlled manually or descend slowly; auto-flight mode is not allowed.

Video: Block GPS signal

Power on ISM.

The device is beyond owner's control, while GPS function will guide the drone go back to the owner, so user can catch both targets easily.

Power on GPS and ISM

The drone completely loses its control, and can be only flying without any intention.

The effective range is up to 1100m

With battery capacity display and weak alarm function

UAV airdrop bomb

UAV smuggling of firearms / drugs

UAV air photography infringement of

UAV interference flight safety

Specification

Length	116 cm x 33 cm x 190 cm
Weight	Less than 6 Kg (Include battery、full set)
Voltage	DC 24V
Battery Capacity	6400 m/Ah
Operational temperature	-10degree~55degree
Relative humidity	95%
Protection Class	IP33
Operation time	60mins
Battery Charge time	4hours
Frequency range	1560~1600GHz 2395~2490GHz 5710~5920GHz
Beam width (range)	±15degree
Output Power	20W(GPS、 2.4G) 3W(5.8G)
Antenna output power	12~15 dBi
Effective range	More than 1100 meter

Standard package

1. UAV Jammer main unit
2. Carrying case
3. external power cord
4. charger
5. tripod holder
6. hand-held bracket

Optional Items

1.Night vision device (With combination set)

2.Thermal imager (With combination set)
